

This practicum focuses on my experiences within the classroom setting of Agricultural Education, emphasizing both the practical and theoretical aspects of teaching in this field. Over the course of the practicum, I observed and actively participated in the delivery of lessons related to agricultural science, leadership development, and career readiness. The experience provided valuable insights into integrating hands-on learning, such as laboratory exercises and field trips, alongside traditional classroom instruction. This hands-on approach gave me a deeper understanding of how agricultural education fosters critical thinking, problem-solving, and collaboration among students. Additionally, I explored the role of Agricultural Educators in promoting sustainable practices, community engagement, and the development of future leaders in the agricultural sector. The practicum ultimately enhanced my understanding of the diverse responsibilities of an Agricultural Educator and provided me with practical skills in lesson planning, classroom management, and student assessment.
